

CHFC Applauds President Biden's Hydrogen Hub Funding Announcement

Washington, DC - The Clean Hydrogen Future Coalition (CHFC) joins in enthusiastic support for President Biden's announcement of the seven regional clean hydrogen hubs that were selected to receive \$7 billion in Bipartisan Infrastructure Law funding to accelerate the domestic market for clean hydrogen. These hubs represent a significant leap forward to advance the deployment of hydrogen technologies and hold the promise of decarbonizing key sectors of the nation's economy.

As a coalition dedicated to promoting clean hydrogen as a key element of the transition to a low-carbon, future, the CHFC takes pride in the role we played in the development of this groundbreaking program.

The allocation of federal funds to these seven hydrogen hubs underscores our coalition's commitment to advancing clean hydrogen as a viable solution for addressing the challenges of climate change.

The clean hydrogen hubs will not only create jobs and stimulate economic growth, but also position the United States as a global leader in clean hydrogen production, storage, and utilization.

The CHFC is committed to continuing our collaboration with government agencies, private sector partners, and the wider clean energy community to ensure the success of these regional clean hydrogen hubs. We are eager to work with all stakeholders to maximize the potential of hydrogen as a clean and versatile energy carrier.

Once again, we express our gratitude to Congress, President Biden and the federal government for their unwavering commitment to advancing clean hydrogen technology and clean energy solutions. We are excited about the path ahead and the many opportunities it presents for a cleaner, more sustainable future for all Americans.
