Clean Hydrogen Future Coalition Celebrates National Hydrogen and Fuel Cell Day

This October 8th, the Clean Hydrogen Future Coalition (CHFC) proudly joins industry partners, policymakers, and advocates in celebrating National Hydrogen and Fuel Cell Day. The date 10/08 was chosen in recognition of hydrogen's atomic weight (1.008) and serves as a reminder of the critical role hydrogen plays in advancing American energy dominance.

Over the past year, CHFC has been at the forefront of efforts to safeguard the 45V Clean Hydrogen Production Tax Credit during the reconciliation process. By uniting a broad coalition of stakeholders, engaging directly with Congress, and amplifying the importance of hydrogen to U.S. energy goals, CHFC played a leading role in ensuring that 45V was not prematurely phased out to serve as the foundation for America's hydrogen economy.

45V is spurring private sector investment, advancing deployment of innovative hydrogen projects, and strengthening America's role as a global leader in energy technologies.

As we celebrate National Hydrogen and Fuel Cell Day 2025, CHFC looks forward to building this momentum. Together, we will continue to advocate for policies that accelerate the deployment of clean hydrogen at scale, foster innovation, and create new opportunities for decarbonizing our economy.

###

The Clean Hydrogen Future Coalition represents a diverse group of energy companies, utilities, NGOs, equipment suppliers, project developers and labor groups who are committed to the advancement of a low carbon hydrogen economy that is supported by infrastructure and investments across the supply chain necessary to fully scale a clean hydrogen industry.
